

SPUTNIC

“Seminars Promoting the Use of Technologies for Networking and International Collaboration”

PROJECT OBJECTIVES

1. Raising awareness about the beneficial impact of the implementation of new educational technologies that enhance international networking for an institution, its staff and its students.
2. Spreading know-how of those educational technologies derived from successful Minerva and other Socrates projects that boost international cooperation.
3. Providing a theoretical background as well as practical models and hands-on experience.
4. Stimulating staff to engage in initiatives on international mobility and international cooperation.

OUTPUTS

1. Seminar Series: four training seminars on one topic each.
2. Large scale dissemination workshops at EDEN 2007 and Online Educa Berlin 2007.
3. Student symposium by the Board of European Students of Technology.
4. An interactive website, open for everyone, that contains all the training materials and outputs of the Socrates projects provided in the seminars.
